© 1995-2025, Dassault Systemes SolidWorks Corporation, a Dassault Systèmes company, 175 Wyman Street, Waltham, Mass. 02451 USA. All Rights Reserved.

The information and the software discussed in this document are subject to change without notice and are not commitments by Dassault Systemes SolidWorks Corporation (DS SolidWorks).

No material may be reproduced or transmitted in any form or by any means, electronically or manually, for any purpose without the express written permission of DS SolidWorks.

The software discussed in this document is furnished under a license and may be used or copied only in accordance with the terms of the license. All warranties given by DS SolidWorks as to the software and documentation are set forth in the license agreement, and nothing stated in, or implied by, this document or its contents shall be considered or deemed a modification or amendment of any terms, including warranties, in the license agreement.

For a full list of the patents, trademarks, and third-party software contained in this release, please go to the Legal Notices in the SOLIDWORKS documentation.

Restricted Rights

This clause applies to all acquisitions of Dassault Systèmes Offerings by or for the United States federal government, or by any prime contractor or subcontractor (at any tier) under any contract, grant, cooperative agreement or other activity with the federal government. The software, documentation and any other technical data provided hereunder is commercial in nature and developed solely at private expense. The Software is delivered as "Commercial Computer Software" as defined in DFARS 252.227-7014 (June 1995) or as a "Commercial Item" as defined in FAR 2.101(a) and as such is provided with only such rights as are provided in Dassault Systèmes standard commercial end user license agreement. Technical data is provided with limited rights only as provided in DFAR 252.227-7015 (Nov. 1995) or FAR 52.227-14 (June 1987), whichever is applicable. The terms and conditions of the Dassault Systèmes standard commercial end user license agreement shall pertain to the United States government's use and disclosure of this software, and shall supersede any conflicting contractual terms and conditions. If the DS standard commercial license fails to meet the United States government's needs or is inconsistent in any respect with United States Federal law, the United States government agrees to return this software, unused, to DS. The following additional statement applies only to acquisitions governed by DFARS Subpart 227.4 (October 1988): "Restricted Rights - use, duplication and disclosure by the Government is subject to restrictions as set forth in subparagraph (c)(l)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252-227-7013 (Oct. 1988)."

In the event that you receive a request from any agency of the U.S. Government to provide Software with rights beyond those set forth above, you will notify DS SolidWorks of the scope of the request and DS SolidWorks will have five (5) business days to, in its sole discretion, accept or reject such request. Contractor/ Manufacturer: Dassault Systemes SolidWorks Corporation, 175 Wyman Street, Waltham, Massachusetts 02451 USA.

Local User Groups 5

Introduction to Nonlinear Structural Analysis

Introduction 8
Types of Nonlinearities 9
Geometric Nonlinearities 10
Material Nonlinearities 11
Solving Nonlinear Problems 12

Geometric Nonlinear Analysis

Introduction. . . . 14
Small Displacement Analysis 14
Large Displacement Analysis 15
Finite Strain Analysis 16
Large Deflection Analysis. 17
References. . . . 18

Material Models and Constitutive Relations

Introduction. . . . 20
Elastic Models. . . . 20
Linear Elastic Model 20
Nonlinear Elastic Model. . . . 21
Hyper-elastic Models 22
Elasto-Plastic Models 27
Basic Characteristics. . . . 27
Essential Concepts of Elasto-plasticity. . . . 28
Elasto-Plastic Models 31
Super Elastic Nitinol Model 35
Flow Rule 37
Linear Visco-Elastic Model 38
Creep Model 41
References. . . . 43

Interaction Analysis

Introduction. . . . 46
Component Interaction/ Gap Conditions 46
Local Interaction/ Gap Conditions 46
Troubleshooting for Gap / Interaction Problems 49
References. . . . 50

Numerical Procedures for Nonlinear FEA

Overview. . . . 52
Incremental Control Techniques 52
Force Control Method. . . . 52
Displacement Control Method 53
Arc-length Control Method 53
Iterative Methods 54
Newton-Raphson (NR) 55
Modified Newton-Raphson (MNR) 56
Termination Criteria 57
References. . . . 57

Lesson 1:
Large Displacement Analysis

Objective . . . 59
Case Study: Hose Clamp . . . 60
Problem Statement . . . 60
Stages in the Process . . . 60
Linear Static Analysis . . . 60
Auxiliary Boundary Conditions . . . 62
Solvers . . . 64
Geometrically Linear Analysis: Limitations . . . 66
Nonlinear Static Study . . . 66
Time Curves (Load Functions) . . . 67
Fixed Incrementation . . . 68
Large Displacement Option: Nonlinear Analysis . . . 69
Analysis Failure: Large Load Step . . . 70
Fixed Time Incrementation Disadvantages . . . 72
Autostepping . . . 72
Autostepping Incrementation . . . 72
Autostepping Parameters and Options . . . 72
Advanced Options: Step/Tolerance Options . . . 73
Linear Static Study (Large Displacement) . . . 74
Summary . . . 76
Questions . . . 77

Lesson 2:
Incremental Control Techniques

Objective . . . 79
Incremental Control Techniques . . . 80
Force Control . . . 80
Displacement Control . . . 80
Case Study: Trampoline . . . 81
Project Description . . . 81
Stages in the Process . . . 81
Linear Analysis . . . 82
Membrane Structures . . . 86
Nonlinear Analysis - Force Control . . . 87
Initial Instability of Thin Flat Membranes . . . 89
Releasing Prescribed Displacement . . . 89
Restart Function . . . 91
Analysis Progress Dialog Box . . . 92
Analytical Results for Membranes . . . 93
Nonlinear Analysis - Displacement Control . . . 94
Displacement Control Method: Displacement Restraints . . . 94
Single Degree of Freedom Control Limitation . . . 95
Loading Mode in Displacement Control Method . . . 95
Summary . . . 99
Questions . . . 99

Lesson 3: Nonlinear Static Buckling Analysis

Objective . . . 101
Case Study: Cylindrical Shell . . . 102
Problem Statement . . . 102
Stages in the Process . . . 102
Linear Buckling . . . 102
Linear Buckling: Assumptions and Limitations . . . 106
Linear Static Study . . . 106
Nonlinear Symmetrical Buckling . . . 107
Arc Length Control Method . . . 107
Arc Length: Parameters . . . 109
Discussion . . . 114
Symmetrical vs. Asymmetrical Equilibrium, Bifurcation Point . . . 115
Nonlinear Asymmetrical Buckling . . . 115
Summary . . . 120
Questions . . . 120
Exercise 1: Nonlinear Analysis of a Shelf . . . 121
Problem Statement . . . 121
Linear Buckling Analysis . . . 123
Nonlinear Buckling Analysis . . . 124
Discussion . . . 128
Summary . . . 128
Exercise 2: Nonlinear Analysis of Remote Control Button . . . 129
Problem Statement . . . 129
Summary . . . 133

Lesson 4: Plastic Deformation

Objective . . . 135
Plastic Deformation . . . 136
Case Study: Paper Clip . . . 136
Problem Statement . . . 137
Stages in the Process . . . 137
Linear Elastic . . . 137
Nonlinear Study with Linear Material . . . 140
Nonlinear - von Mises . . . 142
Nonlinear - Tresca’s . . . 145
Discussion . . . 148
Stress Accuracy (Optional) . . . 148
Mesh Sectioning . . . 150
Summary . . . 152
Questions . . . 152

Exercise 3: Stress Analysis of a Beam Using Nonlinear Elastic Material 153
Problem Statement 153
Summary 157
Exercise 4: Oil Well Pipe Connection 158
Problem Description 158
Materials 160
Loading Conditions 160
Goal 160

Lesson 5: Hardening Rules

Objective 161
Hardening Rules 162
Case Study: Crank Arm 162
Problem Statement 162
Stages in the Process 162
Isotropic Hardening 162
Discussion 167
Kinematic Hardening 167
Discussion 168
Summary 169
Questions 169

Lesson 6: Analysis of Elastomers

Objective 171
Case Study: Rubber Pipe 172
Problem Statement 172
Stages in the Process 172
Two Constant Mooney-Rivlin (1 Material Curve) 173
Discussion 178
Coefficient of Determination 179
2 Constant Mooney-Rivlin (2 Material Curves) 179
2 Constant Mooney-Rivlin (3 Material Curves) 181
6 Constant Mooney-Rivlin (3 Material Curves) 183
Summary 186
Questions 186
Exercise 5: Analysis of a Seal 187
Problem Statement 187
Summary 189

Lesson 7: Nonlinear Interaction Analysis

Objective 191
Case Study: Rubber Tube 192
Problem Statement 192

Connections 195
Interactions 195
Connectors 195
Contact Instabilities 198
Stabilization 198
Explore and Compare Stabilizing Solutions 200
Dynamic Solution 202
Summary 205
Questions 205
Exercise 6: Seal Assembly 206
Problem Description 206
Exercise 7: Container Seal 209
Problem Description 209
Exercise 8: Gear Assembly 214
Problem Description 214
Materials 214
Loading Conditions 214
Goal 214

Lesson 8: Metal Forming

Objective 215
Bending 216
Case Study: Sheet Bending 216
Problem Statement 216
Stages in the Process 217
Plane Strain 218
Large Strain Formulation Option 224
Convergence Problems 225
Automatic Stepping Problems 225
Discussion 230
Small Strain Vs. Large Strain Formulations 232
Summary 234
Questions 235
Exercise 9: Large Strain Contact Simulation - Flanging 236
Problem Description 236
Materials 236
Loading Conditions 236
Goal 236

Appendix A: True and Engineering Stress and Strain

Engineering Stress and Strain 238
